

Triple 20 Plus

Micro Nutrients

100% Soluble Fertilizer Concentrate

Dissolves Instantly In Cold Water

Guaranteed Analysis 20-20-20

READ ENTIRE CONTAINER LABEL BEFORE USING THIS PRODUCT

GUARANTEED ANALYSIS: 20-20-20

Total Nitrogen (N).....	20.0%
3.9% Ammoniacal Nitrogen	
5.5% Nitrate Nitrogen	
10.6% Urea Nitrogen	
Available Phosphoric Acid (P2O5).....	20.0%
Soluble Potash (K2O).....	20.0%
Copper (Cu).....	0.05%
0.05% Chelated Copper	
Iron (Fe)	0.10%
0.10% Chelated Iron (Fe)	
Manganese (Mn).....	0.05%
0.05% Chelated Manganese (Mn)	
Molybdenum (Mo).....	0.0005%
Zinc (Zn).....	0.05%
0.05% Chelated Zinc (Zn)	

Derived from: Mono-Ammonium Phosphate, Potassium Nitrate, Low Biuret Urea, Copper Ethylenediaminetetraacetate (EDTA), Iron EDTA, Manganese EDTA, Sodium Molybdate and Zinc EDTA.

CAUTION
Keep out of Reach of Children.
Harmful if swallowed.
Avoid breathing dust.
PLANTS CONTAINING AN EXCESS OF MOLYBDENUM CAN BE TOXIC TO LIVESTOCK. CERTAIN PLANTS MAY BE SENSITIVE TO MOLYBDENUM.

GENERAL DIRECTIONS

For general application, dissolve 2 to 4 lbs. per 100 gal. of spray solution or use 5 to 10 lbs. per acre. May be applied by aircraft at rates as low as 5 lbs. per 2 gal. of water per acre. For backpack sprayer use 4 teaspoons per gallon of water.

FIELD AND VEGETABLE CROPS: As a foliar spray use 5 to 10 lbs. per acre. Applications may be made at 7 to 10 day intervals depending on the amount of growth desired or when supplement feeding is necessary. Depending on the crop the first treatment should be made when the plants are 3 to 4 weeks old or when there is sufficient foliage for spraying. These rates may be applied to Field Crops (cotton, soybeans, peanuts, corn, alfalfa, sorghum, and forage crops) or to Vegetable Crops (tomatoes, peppers, cucumbers, beans, lettuce, celery, melons, squash, radishes, onions, broccoli, cabbage, spinach, cauliflower and potatoes).

FRUIT AND NUT CROPS: As a foliar spray use at the rate of 5 to 10 lbs. per acre. For dilute sprays use 2 lbs. per 100 gal. of water. Apply early in the season or when improved vigor is desired. 3 to 4 applications may be applied per season.

CAUTION: Do not use **First Choice Triple 20 Plus** in late season sprays where fruit color and maturity is delayed by nitrogen applications. These rates may be applied to citrus (all kinds) apples, peaches, pears, pecans, avocados, plums, prunes, apricots, cherries, walnuts, almonds, nectarines, strawberries, grapes, and other vine crops.

COMMERCIAL NURSERY AND GREENHOUSE

As a direct foliar spray use 2 to 4 lbs. per 100 gal. or 4 tsp. per gal. of water.

Greenhouse Cut Flowers, Flats, and Small Pots: Use 2 lbs. per 100 gals. of water for intermittent feeding (every 2 weeks); for constant feeding (every watering) use 4 to 8 oz. per 100 gal. of water.

Container Foliage Plants: Use up to 3½ lbs. per 100 gal. of water for intermittent feeding. For constant feeding use 8 to 12 oz. per 100 gal. of water.

Orchids: For periodic feeding use 5 to 6 lbs. in 100 gal. of water; for constant feeding use 1 to 1½ lbs. per 100 gal. of water.

Starter and Transplant: Dissolve 2 lbs. in 100 gal. of water using either as a foliar spray or using 4 to 8 oz. of solution per plant. To prepare a slurry add ¼ lb. to a 3 gal. bucket of puddle soil.

COMMERCIAL LANDSCAPE TREES AND SHRUBS, AND NEW LAWNS:

For foliar spray of root feeding use 2 lbs. per 100 gal. of water. Also, for seeding lawns, ½ lb. may be mixed with each lb. of grass seed; apply by spreader or broadcast evenly over 200 sq. ft.

ESTABLISHED COMMERCIAL TURF, LAWNS AND GOLF GREENS:

Apply when soil is wet 1 to 2 lbs. per 1,000 sq. ft. dissolved in 10 or more gal. of water every 7 to 10 days or as needed.

HYDRO-SEEDING: Use 1 lb. per 1,000 sq. ft. with hydro-seeding slurry.

INJECTOR -PROPORTIONER RATIOS: (400 ppm nitrogen) 1:200 use 4 lbs. per gallon; 1:100 use 2 lbs. per gallon; 1:13 use 4 oz. per gallon, (150 ppm nitrogen) 1:200 use 20.2 oz. per gallon; 1:100 use 10.1 oz. per gallon; 1:13 use 1.3 oz per gallon. **NOTE:** 2 lbs. in 100 gal. water (400 ppm nitrogen) equals 1 oz in 3 gals., 1 tablespoon in 1 gal., or ¾ teaspoon per qt.

MIXING INSTRUCTIONS

Add "First Choice Triple 20 Plus" to tank when half full, agitation is advised. "First Choice Triple 20 Plus" fertilizer is soluble up to 6½ lbs. per gallon. Water temperature plays an important role in determining fertilizer solubility. The higher the water temperature the greater the solubility and quicker the dissolving time. As fertilizers are added to the solution, there is an immediate decrease in water temperature. It is important when preparing concentrated solutions to allow for this temperature drop to ensure that all the fertilizer is properly dissolved.

COMPATIBILITY:

"First Choice Triple 20 Plus" is compatible with most commonly used pesticides and fungicides. However a compatibility test is recommended before full scale mixing. If the desired combination has not been used in the past.

The seller hereby represents and warrants that the fertilizers shall be manufactured and shipped to purchaser in a form suitable for application to plants, trees and other agricultural crops and hereby represents and warrants that the fertilizer product shall meet the guaranteed minimum analysis as set forth on the product identity labels. However this warranty does not extend to the use of these products, contrary to label instructions, and the buyer assumes the risk of any such use.
