### GENERAL INFORMATION

First Choice 30-5-10 High Iron Formula is designed for golf course fairways, roughs, sportsturf, landscape turf, cemeteries and any other area where green healthy turf is desired. 56% of the Nitrogen is derived from polymer-coated urea to provide extended feeding. 44% of the Nitrogen is immediately available for rapid greening. High potassium aids in strong root development and overall turf health. The slow release rate of 30-5-10 ensures uniform turf growth which leads to less frequent mowing.
