**GENERAL INFORMATION**

Western Farm Service 16-16-16 ME (minor elements) is a quality granular fertilizer developed for agricultural growers, landscapers and turf professionals. This formulation includes Iron, Zinc and Manganese, the three minor elements often deficient in alkaline soil conditions. Western Farm Service 16-16-16 ME is formulated using Potassium Chloride, providing an economical source of soluble potassium. This fertilizer is excellent choice for applications that require a uniform ratio of Nitrogen, Phosphorous and Potassium.

**APPLICATION PRECAUTIONS**

The application rates listed are only guidelines used in developing a fertilizer program. The rates may not apply to your local growing conditions. It is the grower's responsibility to determine the appropriate application rates. Trial this product before use under your local growing conditions, application methods and desired rates. Adjust irrigation volume and frequency

to maintain appropriate soluble salt levels. Iron and other plant nutrients can cause staining of cement. Avoid mounding of fertilizer against base of plants. Store in a clean, cool and dry location.

**CONDITIONS OF SALE**

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use, storage or handling of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. These risks include, but are not limited to, damage to plants, crops and animals to which the material is applied, damage caused by drift to other plants or crops, and personal injury.
