

CITROMAX®

A LOW CHLORIDE SUSPENSION FOLIAR FERTILIZER FOR THE CORRECTION OF ZINC AND MANGANESE DEFICIENCIES

READ ENTIRE CONTAINER LABEL BEFORE USING THIS PRODUCT

GUARANTEED ANALYSIS:

Total Nitrogen (N)	3.50%
3.50 % Nitrate Nitrogen	
Sulfur (S).....	5.00%
Manganese (Mn).....	8.50%
Zinc (Zn)	8.50%

Derived from: Zinc nitrate and manganese sulfate.

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

FIRST CHOICE CITROMAX is low in toxicity but can cause skin irritation in the concentrate form, and can irritate the eyes on prolonged exposure. Eye and skin protection should be worn when mixing and spraying this product. In case of skin exposure to the concentrate, wash thoroughly with soap and water. In case of eye exposure, flush eyes for 15 minutes with clean water and seek medical treatment.

Chlorine not more than0.20%

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://westernfarmservice.com/non-nutritivemetals.htm>

GENERAL INFORMATION

FIRST CHOICE CITROMAX is a water soluble foliar nutritional fertilizer for the correction of Zinc and Manganese deficiencies in Citrus, Avocados and other tree fruits. It may also be used for the correction of Zinc and Manganese deficiencies in Azaleas and other ornamentals. It is designed for foliar application and may be applied alone or in tank mixes containing pesticides. However, when use of an unfamiliar mix is made, a compatibility jar test is always recommended.

Foliar fertilization is a supplement to a regular fertilizer program and will not supply the total nutrients required by a crop. FIRST CHOICE CITROMAX is recommended as a foliar nutrient to be applied where symptoms of Zinc or Manganese deficiency are apparent or anticipated.

DIRECTIONS FOR USE

FOLIAR APPLICATIONS: (GROUND) Apply 1-2 pints per acre as a full cover spray in a minimum of 50 gallons water per acre. For high volume dilute applications, use a maximum rate of 4 pints per acre. (AIR) apply 1-2 pints per acre in a minimum of 20 gallons water per acre.

CITRUS - Apply during Spring and Autumn growth.

AVOCADOS - Apply during flushes of growth.

TREE FRUIT - Apply during vegetative growth.

AZALEAS AND OTHER ORNAMENTALS - Apply during flushes of growth in early Spring.

SOIL APPLICATIONS: To correct localized deficiencies: Apply ½ -1 gallon per acre during the growing season.

MIXING DIRECTIONS

Add FIRST CHOICE CITROMAX to the spray tank after filling the tank half full of water and after adding other spray materials. Then continue filling the spray tank. The addition of a non-ionic surfactant is recommended when using high volumes of spray solutions.

STORAGE AND TRANSPORT

FIRST CHOICE CITROMAX should be stored at temperatures above 40 F.

FIRST CHOICE CITROMAX is not considered a hazardous material for transportation purposes.

CONDITIONS OF SALE AND WARRANTY

1. Seller warrants that this material conforms to the chemical description on the label and is reasonably fit for use as directed hereon. Seller neither makes nor authorizes any agent or representative to make, any other warranty of FITNESS or MERCHANTABILITY, guarantee or representation, express or implied, concerning this material.
2. Critical and unforeseeable factors beyond seller's control prevent it from eliminating all risks in connection with the use of chemicals. Such risks include, but are not limited to damage to plants and crops to which the material is applied, lack of complete control, and damage caused by drift to other plants or crops. Such risks occur even though the product is reasonably fit for the uses stated hereon, and even though label directions are followed. Buyer and user acknowledge and assume all risks and liability (except those assumed by seller under 1. above) resulting from handling, storage and use of the material.

NET CONTENTS: 2.5 GALLONS (9.463 LITERS)
Net Weight: 14.0 lbs./gallon (1.677 kegs. /liter)
