CAUTION: Harmful If Swallowed**

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://westernfarmservice.com/non-nutritivemetals.htm>

GENERAL INFORMATION

FIRST CHOICE CITRUS MICRO BLEND is especially recommended to prevent and correct manganese and zinc deficiencies in citrus crops, but it may also be used on field, row, vegetable, fruit, nut, vine, ornamental and turf crops. FIRST CHOICE CITRUS MICRO BLEND alone, with pesticides, or with other fertilizers, may be applied directly to the soil or to the foliage of growing crops. FIRST CHOICE CITRUS MICRO BLEND may be applied via ground sprayers (high-volume or low-volume), aircraft or fertigation systems.

DIRECTIONS FOR USE

Soil applications of FIRST CHOICE CITRUS MICRO BLEND are recommended with nitrogen fertilizer solutions. Thorough coverage and wetting are needed for optimum foliar spray results. Actively growing plants with young leaves absorb foliarly applied FIRST CHOICE CITRUS MICRO BLEND most efficiently. Immediate post-irrigation or post-rainfall application give the best foliar uptake. Addition of urea (for example, 5 lbs. Lo-Bi Urea per 100 gallons of spray solution) will enhance foliar uptake of FIRST CHOICE CITRUS MICRO BLEND.

COMPATIBILITY: FIRST CHOICE CITRUS MICRO BLEND is compatible with most pesticides and fertilizers. However if the desired combination has not been previously used, a compatibility test is recommended.

MIXING: Shake, stir, or swirl contents before using. Always add this product to the spray tank before adding pesticides.

SOIL APPLICATIONS FOR ALL CROPS*

| | |
|---------------------------------|----------------|
| Soil Fertility Maintenance..... | 1-3 qts./acre |
| Mild Deficiency..... | 2-6 qts./acre |
| Severe Deficiency..... | 1-3 gals./acre |

*The lower rates are for field, row and vegetable crops. The higher rates are for fruit, tree, vine, ornamental and turf crops.

FERTIGATION: Apply the recommended amount of product in split applications one to two weeks apart throughout the growing season.

FOLIAR APPLICATIONS FOR ALL CROPS

Applications should be separated by a minimum of 7-14 days. AVOID foliar applications of this product when plants are under moisture stress. AVOID foliar applications to deciduous tree crops during bloom.

DILUTE APPLICATIONS: For rates higher than 2 quarts per acre, split applications of 2 quarts or less are preferred to minimize phytotoxicity.

CONCENTRATE APPLICATIONS: Use up to 2 quarts of FIRST CHOICE CITRUS MICRO BLEND in a minimum of 25 gallons of water.

AERIAL APPLICATIONS: Up to 1 quart of FIRST CHOICE CITRUS MICRO BLEND per 5 gallons of spray may be used, but more dilute solutions will improve coverage and results.

CONDITIONS OF SALE

1. Western Farm Service, Inc. (WFSI) warrants that this material conforms to the chemical description on the label and is reasonably fit for use as directed hereon. WFSI neither makes, nor authorizes any agent or representative to make, any other warranty of FITNESS or of MERCHANTABILITY, guarantee, or representation, express or implied, concerning this material

2. Critical and unforeseeable factors beyond WFSI's control prevent it from eliminating all risks in connection with the use of this material. Such risks include, but are not limited to, damage to plants and crops to which the material is applied, lack of complete control and damage caused by drift to other plants or crops. Such risks occur even though the product is reasonably fit for the uses stated hereon and even though label directions are followed. Buyer and user acknowledge and assume all risks and liability resulting from handling, storage and use of this material (except those assumed by WFSI in paragraph 1 above). WFSI shall not be liable for incidental or consequential damages.
