

FOR USE IN IDAHO

LIQUID COPPER 5% NUTRIENT COMPLEX

READ ENTIRE LABEL BEFORE USING THIS PRODUCT

GUARANTEED ANALYSIS:

Sulfur (S) 2.5%
Copper (Cu) 5.0%
Derived from copper sulfate and sulfonic acids of lignosulfates.

**KEEP OUT OF REACH OF CHILDREN
CAUTION**
Harmful if swallowed. Avoid breathing spray mist. May cause irritation of nose, throat or skin. Avoid contact with eyes, skin and clothing. Do not contaminate feed or foodstuffs. Do not apply to any area not specified on label. Do not re-use empty container. Wash thoroughly with water and detergent. Puncture, make un-usable. Dispose of in a safe place.

GENERAL INFORMATION

FIRST CHOICE LIQUID COPPER 5% is designed for foliar application to growing crops, alone or with pesticides.

FIRST CHOICE LIQUID COPPER 5% may be applied directly to soil, alone or with pesticides or herbicides.

FIRST CHOICE LIQUID COPPER 5% may be used in drip irrigation systems.

FIRST CHOICE LIQUID COPPER 5% as a spray acidifier (buffer) when added in proper proportions to pesticide spray water, will help prevent hydrolysis (breakdown) of certain pesticides (organic phosphates, carbamates, etc.)

FIRST CHOICE LIQUID COPPER 5% is compatible with most water-dispersed pesticides

FIRST CHOICE LIQUID COPPER 5% may be applied via conventional (high volume), low volume or air-craft sprayers

FIRST CHOICE LIQUID COPPER 5% is recommended for all field, row, vegetable, fruit, tree, vine, ornamental and turf crops.

DIRECTIONS FOR USE

ALL CROPS:

Nutrient Maintenance..... 1 qt/acre
Light Deficiency..... 2 qts./acre
Severe Deficiency..... 1 gal./acre

When rates of over 1 quart are called for, split or multiple applications of 1 quart or less each are preferred. Applications should be separated by a minimum of 10-14 days.

CONVENTIONAL (DILUTE) SPRAY APPLICATIONS:

While the entire required quantity may be applied at one time, split applications will improve overall efficiency of uptake and will be more effective. Apply the required amount of this product in enough water for good coverage. Complete wetting of the foliage is not required.

GROUND CONCENTRATE APPLICATIONS:

Use up to 1 quart of this product in a minimum of 25 gallons of water per acre per application. Repeat in 10-14 days if greater amounts of this product are required.

AIR APPLICATIONS:

Normal aerial application is 1 quart of this product per 5 gallons of water per acre per application. **MAXIMUM** concentration of 1 quart per gallon of spray may be used, but larger quantities of water will improve coverage.

LIQUID FERTILIZER APPLICATIONS:

This product may be applied with all nitrogen solutions.

Thoroughly mix this product with the nitrogen solution before applying.

DRIP IRRIGATION:

The required amount of this product should be applied over the growing season of the crop via multiple applications 1-2 weeks apart. Avoid co-application with phosphate-containing fertilizer solutions.

WITH pesticides or herbicides, **always** add this product to spray tank **before** adding the herbicide or pesticide. The alkaline water usually encountered in the Western United States will require 1-2 quarts per 100 gallons of spray water.

AVOID foliar applications of this product when plants are under moisture stress. Immediate post-irrigation or post-rainfall applications give best foliar uptake of nutrients. Avoid periods of high temperatures or low humidity.

ACTIVELY growing plants with young leaves absorb nutrients most effectively.

ADDITION of nitrogen (for example 5 lbs of Lo-Bi urea per 100 gals of spray) will increase efficiency of nutrient uptake.

COMPATIBILITY: This product is compatible with most pesticides except basic products such as lime, lime-sulfur, basic metal sulfates, metal oxides, etc. A compatibility test is recommended if the desired combination has not been used in the past.

**SHAKE, STIR OR SWIRL
CONTENTS BEFORE USING**

CONDITIONS OF SALE AND WARRANTY

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop, soil, and other conditions may vary, Western Farm Service, Inc., and/or seller make no warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use of handling whether or not in accordance with directions or suggestions.
