#### State of Washington

After July 1, 1999, information received by the Washington State Department of Agriculture regarding the components in this product is available on the internet at <http://www.wa.gov/agr/>.

### GENERAL PRODUCT INFORMATION

**FIRST CHOICE 7.5% Copper Chelate Solution** is fully chelated and in a form readily available to plants. It is recommended for use as an additive in dry or liquid fertilizer and can also be used in irrigation systems or as a foliar spray. **FIRST CHOICE 7.5% Copper Chelate Solution** is also compatible with most herbicides, insecticides and agricultural chemicals that may be utilized in combination with liquid fertilizer. **FIRST CHOICE 7.5% Copper Chelate Solution** is most effective when placed in the root zone during planting or moved into the soil by irrigation, tillage or rainfall. It is important to treat the copper deficiency before visual symptoms appear to insure proper yields. Rates of application will vary depending upon the severity of the deficiency climate, soil type and method of application. Consult your State Agricultural Experiment Station or Extension Specialist for advice in selecting treatments from this label to best fit local conditions.

**NOTICE:** Extreme caution should be used as these rates depend on crop sensitivity. Consult your Western Farm Service crop consultant prior to application.

### DIRECTIONS FOR USE

**FIELD CROPS INCLUDING CORN, SORGHUM, BEANS, COTTON ALFALFA AND VEGETABLE CROPS SOIL**

**APPLICATION:** Apply 1-2 quarts of **First Choice 7.5% Copper Chelate Solution** per acre in liquid starter fertilizer. Rate will depend on extent of copper deficiency and soil type.

**FOLIAR APPLICATION:** Dilute quart of **First Choice 7.5% Copper Chelate Solution** per 100 gallons of water and spray to thoroughly cover foliage. Apply 4-5 weeks after planting or when copper deficiency symptoms appear.

**VINE FRUIT AND NUT CROPS INCLUDING APPLES, PEARS and CITRUS SOIL APPLICATION:**

Apply 1/2-2 quarts of **First Choice 7.5% Copper Chelate Solution** per tree depending on soil conditions and size of tree. It is important to spread material uniformly around the tree and water thoroughly for rapid response.

**FOLIAR APPLICATION:** Dilute 1-2 quarts of **First Choice 7.5% Copper Chelate** per 20-100 gallons of water and spray to thoroughly cover foliage in early spring shortly after trees are fully leafed out. Follow with a second application in two to three weeks to correct severe deficiency. May be tank mixed with 1-2 quarts of **First Choice 4 1/2% Iron Chelate Solution** and/or 1-2 quarts of **First Choice 5% Manganese Chelate Solution**.

**APPLICATION INFORMATION SOIL APPLICATION:** **First Choice 7.5% Copper Chelate Solution** can be applied alone or in combination with dry or liquid fertilizer for pre-plant, starter or side dress applications. For most effective treatment of row crops, make soil application in a band at planting time or as a side dressing shortly after planting.

**FOLIAR APPLICATION:** **First Choice 7.5% Copper Chelate Solution** when diluted with water according to label recommendations can be applied as a foliar spray. To ensure even distribution on the leaf surfaces and increase the effectiveness of foliar application add to 1 pint **First Choice Excel 90 NF** per 100 gallons spray solution.

**NOTE:** If label instructions are not followed for foliar application, phytotoxicity may occur.

**STORE ABOVE 32° F  
DO NOT REUSE CONTAINER**

### CONDITIONS OF SALE AND WARRANTY

1. Seller warrants that this material conforms to the chemical description on the label and is reasonably fit for use as directed hereon, Seller neither makes nor authorizes any agent or representative to make, any other warranty of FITNESS or of MERCHANTABILITY, guarantee or representation, express or implied, concerning this material.
2. Critical and unforeseeable factors beyond seller's control prevent it from eliminating all risks in connection with the use of chemicals. Such risks include, but are not limited to damage to plants and crops to which the material is applied, lack of complete control, and damage caused by drift to other plants or crops. Such risks occur even though the product is reasonably fit for the uses stated hereon, and even though label directions are followed. Buyer and user acknowledge and assume all risks and liability (except those assumed by seller under 1. above) resulting from handling, storage and use of the material.
