WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

WARNING: This fertilizing material contains Boron (B) . Use on any crops other than those recommended may result in serious injury to the crop(s).

GENERAL INFORMATION

FIRST CHOICE EvenBreak for Deciduous Trees and Vines is a water-soluble foliar nutritional fertilizer of macro- and micronutrients. It is designed for application 1-3 weeks in advance of expected bud-break and may be applied alone or in tank mixes containing pesticides. However, when use of an unfamiliar mix is made, a compatibility test is always recommended.

EvenBreak is a nutritional supplement to a regular fertilizer program and will not supply the total nutrients required by a crop.

Recommendations for Use:

First Choice EvenBreak is a nutritional supplement used to promote bud break uniformity and shoot vigor in deciduous trees and vines. First Choice EvenBreak must be used in combination with the surfactant Break-thru.

Suggested Application Rates and Timings

To promote early shoot vigor, more uniform bloom and fruit set in grapes and deciduous trees apply one gallon First Choice EvenBreak per acre. Use only with the Non-ionic Surfactant/Penetrant Break-thru at a rate of 5 to 6 ounces per 100 gallons of water. Apply as a directed spray in volumes not to exceed 200 gallons per acre. Uniform spray coverage of bud material is required for good performance. First Choice EvenBreak should be applied 1 to 3 weeks in advance of expected bud break.

Since compressed bloom can occur with the use of First Choice EvenBreak users are advised to have hives in orchards prior to initiation of bloom to insure adequate pollination. Compressed bloom and fruit set can also exacerbate nutritional deficiencies. The use of a fertility monitoring program is recommended.

First Choice EvenBreak is not a substitute for chill hours and the desired uniformity in bloom and fruit set will not occur with this product unless minimum chill hours are met.

DIRECTIONS FOR USE

Add the required amount of First Choice EvenBreak to half a tank of water and mix well before adding the surfactant Break-thru and or any compatible chemicals. Do not store solution mixed with pesticide! Spray immediately after mixing.

CONDITIONS OF SALE AND WARRANTY

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use, storage or handling of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. These risks include, but are not limited to, damage to plants, crops and animals to which the material is applied, failure to control pests, damage caused by drift to other plants or crops, and personal injury
