GUARANTEED ANALYSIS:

Total Nitrogen (N)..... 6.00%
6.0% Ammoniacal Nitrogen
Sulfur (S)..... 4.00%
Copper (Cu)..... 8.00%
Derived from ammonium hydroxide and copper sulfate complexed with citric acid.

NET WEIGHT: 10.51 lbs./gallon

KEEP OUT OF REACH OF CHILDREN
CAUTION

Metals Content Information
Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>.

GENERAL PRODUCT INFORMATION

FIRST CHOICE 8% AM Copper was developed to be used by itself, or in combination with neutral fertilizers, both at planting time, and during the growing season, for the purpose of providing the nutrient copper to crops. Extreme care should be exercised regarding the timing, rate, method of application, and crop sensitivity. FIRST CHOICE 8% AM Copper may be applied with crop protection chemicals i.e. herbicides, insecticides, and fungicides. It is important to consider climatic conditions prior to application, and anticipated accumulative amount applied for the season. Always consult your Western Farm Service crop advisor prior to application

DIRECTIONS FOR USE

VEGETABLE, FORAGE AND ROW CROPS:
FIRST CHOICE 8% AM Copper may be applied with starter or pop-up fertilizer at the rate of 1 to 4 pints per acre. FIRST CHOICE 8% AM Copper may also be applied with FIRST CHOICE 9% ZINC or FIRST CHOICE Multi-Che Zinc, manganese and iron products. Rates will depend on soil type, anticipated nutrient shortage and placement relative to seed and crop sensitivity. Application - Air - Apply in 5 to 10 gallons of water per acre. Ground - Apply in 20 to 40 gallons of water per acre.

ALL CROPS INCLUDING TREE AND VINE:
FIRST CHOICE 8% AM Copper may be applied to soil by broadcasting, shank, or through irrigation water. Seek the advice of your Western Farm Service crop advisor for rate of application.

SPRINKLER IRRIGATION APPLICATION:
Apply to all field and forage crops at rates ranging from 1 to 8 pints per acre, being careful not to apply excessive amounts where multiple applications are planned for the cropping season.

FOLIAR APPLICATION:
Apply FIRST CHOICE 8% AM Copper by ground or air on all crops at the rate of 1 to 4 pints per acre in sufficient water to achieve thorough coverage. To insure uniform application use a quality FIRST CHOICE brand wetting agent.

PRECAUTIONARY STATEMENT

Phytotoxicity may occur when using copper products, including various tank mix combinations. For fertilizer tank mix combinations, use only neutral fertilizers. Always consult your Western Farm Service crop advisor as to any precautionary measures prior to application.
