

# CITRUS MICRO BLEND PLUS IRON

READ ENTIRE LABEL BEFORE USING THIS PRODUCT

## GENERAL INFORMATION

FIRST CHOICE CITRUS MICRO BLEND PLUS IRON is especially recommended to prevent and correct manganese and zinc deficiencies in citrus crops, but it may also be used on field, row, vegetable, fruit, nut, vine, ornamental and turf crops. FIRST CHOICE CITRUS MICRO BLEND PLUS IRON alone, with pesticides, or with other fertilizers, may be applied directly to the soil or to the foliage of growing crops. This product may be applied via ground sprayers (high-volume or low-volume), aircraft or fertigation systems.

## DIRECTIONS FOR USE

Soil applications of FIRST CHOICE CITRUS MICRO BLEND PLUS IRON are recommended with nitrogen fertilizer solutions. Thorough coverage and wetting are needed for optimum foliar spray results. Actively growing plants with young leaves absorb foliarly applied FIRST CHOICE CITRUS MICRO BLEND PLUS IRON most efficiently. Immediate post-irrigation or post-rainfall application give the best foliar uptake. Addition of urea (for example, 5 lbs. Lo-Bi Urea per 100 gallons of spray solution) will enhance foliar uptake of this product.

**COMPATIBILITY:** This product is compatible with most pesticides and fertilizers. However, if the desired combination has not been previously used, a compatibility test is recommended.

**MIXING:** Shake, stir, or swirl contents before using. Always add this product to the spray tank before adding pesticides.

## GUARANTEED ANALYSIS

|                      |      |
|----------------------|------|
| Sulfur (S) .....     | 4.0% |
| Iron (Fe) .....      | 1.0% |
| Manganese (Mn) ..... | 4.5% |
| Zinc (Zn) .....      | 3.5% |

Derived from ferrous, manganese and zinc sulfates, complexed with lignosulfonate.

## SOIL APPLICATIONS FOR ALL CROPS\*

|                                  |                |
|----------------------------------|----------------|
| Soil Fertility Maintenance ..... | 1-3 qts./acre  |
| Mild Deficiency .....            | 2-6 qts./acre  |
| Severe Deficiency .....          | 1-3 gals./acre |

\*The lower rates are for field, row and vegetable crops. The higher rates are for fruit, tree, vine, ornamental and turf crops.

**Fertigation:** Apply the recommended amount of product in split applications one to two weeks apart throughout the growing season.

## FOLIAR APPLICATIONS FOR ALL CROPS:

Applications should be separated by a minimum of 7-14 days. **AVOID** foliar applications of this product when plants are under moisture stress. **AVOID** foliar applications to deciduous tree crops during bloom.

**Dilute Applications:** For rates higher than 2 quarts per acre, split applications of 2 quarts or less are preferred to minimize phytotoxicity.

**Concentrate Applications:** Use up to 2 quarts of FIRST CHOICE CITRUS MICRO BLEND PLUS IRON in a minimum of 25 gallons of water per acre.

**Aerial Applications:** Up to 1 quart of FIRST CHOICE CITRUS MICRO BLEND PLUS IRON per 5 gallons of spray may be used, but more dilute solutions will improve coverage and results.

**NET CONTENTS: 5 GALLONS / 18.9 L**
